

Standard Hooks

Steel Hooks

Steel hooks or sometimes called thread hooks are sized differently to standard crochet hooks. These hooks are designed to be worked with crochet thread. For both the hooks and thread, as the number increases the size of the hook and thread decreases. This is relative to both the US number and mm size.

Standard hooks are straightforward, between the metric and US sizes. As the number or letter increases so does the size.

Take note this is a guide only, crochet hook size differs between manufacturers.

mm	US	UK imperial
0.4	16	
0.5	15
